## **Dogmatic - Newsletter of Hawke's Bay Dog Training Club Inc.**

---

### **Greetings,**

And welcome to the new look Dogmatic. I hope you like it.

We've had another busy four months and there's lots of congratulations to share around. Lorraine and Phoenix had some great results at the NDOA in Christchurch at Easter - well done! I promised to mention a great result for Dee and Lucy - who came 6th in Jumpers Pairs recently - quite an achievement for a wee cocker spaniel. There's lots of results to be found in the magazine as usual and I also try to post them on Facebook too as we go along - so don't forget to check there and remember to "Like" our page.

Nicky has written an article on Cruciate Ligament injury and treatment options. I was particularly interested as "my dog with half a brain" went through this a while back. I'm pleased to say all went well for Scallywag and he came back to agility better than ever.

As ever, the reports on the various activities that you can take part in a Club are informative and may just tempt you to try your hand at one or two - just check with the co-ordinator for times etc.

We have a few new things in the pipeline at present - there's a new Website coming on stream in the next week or so - thanks Dee. We're introducing a Term structure to agility which will allow the hard pressed instructors to have a break. However, the Agility and Obedience term dates may not coincide so check on their report pages to find out when your particular discipline is training.

Finally, we have two shows coming up in September and I encourage you all to go along to them. They're both being held at Napier Dog Training Club grounds, Sandy Road, Meeanee - details are on the sidebars inside. However, shows don't run themselves - it takes lots of work but it also provides lots of fun. So even if you can only help for a couple of hours, please do - just let your instructor know what you can do to help. Thank you and Cheers - Jackie

## President's Report

Wow we are finally on the other side of winter with having the shortest day been and gone. It's great to see almost everyone is turning up for classes wrapped in their winter woollies. The weather overall has been kind to us with not too many nights that we have been unable to train on. Our

AGM was held in May at the "Clubs Hastings RSA " and it was great to see we had a good turnout of members. It was quite a full on meeting with some sad news. Chrissy had chosen to step down from committee. I would like to thank Chrissy for all her help and assistance throughout the years. Chrissy will continue to still take the Canine Good Citizens Class.

For those of you not aware Colleen and Jane also have chosen to step down from all Club and Committee arrangements. The Committee and I wish to acknowledge the untold hours and hard work that Colleen and Jane have given enabling the smooth running of the Club. Sometimes we do not realise the amount of behind the scenes work valued people put in. Although we will miss them both and are disappointed with the outcome, we have accepted that this is their choice and it has had to have been a big decision that they would have not taken lightly at all. I know I speak for all of us to say a Big Thank You to both ladies for past services and wish them all the very best for the future.

Coming up this year are some fantastic local events and challenges for our club. These shows could not be held without the committed help from our awesome volunteers. We do need your help! There are many areas that require help such as - assisting in the kitchen, setting up courses and being a general helping hand. Please speak to your instructor - they can advise you of what is needed. It would be appreciated as we all know *many hands make light work!*

We have been very lucky this year to have Black Hawk as a Sponsor for our Obedience show. They are providing us with prizes and products for our raffle. Their motto is "Every ingredient matters". What is good about their product is there is no fillers, no preservatives. Their product has " Only Real Meat and Veggies." Please check them out at your local vets/pets store or Seeds and Grains on Caroline Road in Hastings. We need to support our Sponsors!

Enjoy the upcoming term. It is a lot of fun being with our dogs, they are the ones who are always are happy to see us, no matter what type of day we have had.

Keep Up the good work

**Dionne Robinson**

## Agility Report

Our HB Jumpers weekend went well. It was great to see club members enjoying their competing, and helping with the jobs. Most club members achieved some great results with 4 wins across the weekend and a total of 51 clears by club members.

We have made a few changes to classes on Monday nights. All agility members have been notified by email. If classes need to be cancelled due to inclement weather the decision will be made at 3 pm, and people emailed/texted at that time. If you won't be at class would you please text your instructor by the same time to let them know. It makes it much easier to plan a class if we know how many people are likely to be there.

We have our agility ribbon trial on Sunday 9 September at the Napier Dog Training Club rounds. We rely on our club members to help with the running of this event to make it a success. The Napier Dog Training Club have their ribbon trial on the Saturday.

We have our big champ show on 17 and 18 November. Please mark this date on your calendar. This is our big show and we pride ourselves on how well run this show is. We will need everyone helping with this show.

A reminder too to keep an eye on the Agility Website – [www.dogagility.org.nz](http://www.dogagility.org.nz) – look under 'AC' and 'consultation' (among other things). This will keep you updated on things happening in the agility world.

That's all for now – see you all at training.

Cheers

**Robyn – Agility Co-ordinator**

### AGILITY NOTICES

#### EQUIPMENT AND TRAINING

Just a reminder to everyone to make sure you assist with getting the agility equipment out and putting in away. Best way to ensure you do remember is to arrive for your class 15 minutes before it's due to start i.e. 5.15pm for 5.30pm for Foundation; and so on. And though we all want to get home - just check before you leave what needs to be put away or moved.

#### GEAR BOOK

This will be hanging up on the notice board for any member that wishes to borrow equipment. It is to have a date, name of person borrowing the equipment, equipment borrowed, signed by borrower and countersigned by a committee member or instructor. This is so we can keep track of the gear.

## Our Agility Events

### 28/29 April 2018

Jumpers Champ Show  
Venue: Napier DTC  
Sandy Road, Meeanee

### 8/9 September 2018

## Obedience Report

Well, It's pretty scary to say, that here we are half way through the year already! It only seemed like a week or two ago we were in our shirts and light pants and now here we are in our winter woollies battling it out like real troopers.

It is so pleasing to see so many members carrying on with their domestic training from the beginners and intermediate classes ... you will really reap the benefit for sure. Both you and your Dog will gel even more naturally to become an awesome team

Please remember with training it is best to have little and often sessions as your dog will get bored and you may become despondent with your hairy friend.

So even on the days when it is raining or really miserable there should be no excuses as inside your house is a great spot, as hallways and lounges are such great places to do our training in.

Indie and I love playing hide and seek, either with food or a ball after I hide it first and then use the release command. You both will benefit from it as your dog thinks you are having fun. But in reality we are teaching them different commands. Like all training always remember to finish on a good note.

It was a pleasure having Lorraine and her new puppy, Troika, in my class last term. Troika is deaf and it has been wonderful to watch the two of them working together. I have certainly learnt a lot - especially the hand signals Lorraine has been using.

On 29 and 30th of September we are holding our annual Championship Obedience Show. (See side panel)

This is a big show for us and we will be asking you for help - either in the kitchen, bringing food or goods for the raffle or a helping hand on either day. They are always good fun and a nice way to meet likeminded people that share the same interest...Dogs

Finally, I would like to personally thank Deanna who has been helping me with my classes this term. A special thank you to our hard working team, Chrissy, Jackie, Lorraine and Maria for taking classes and we are very lucky to have Heather stepping in and taking a class next term. Well done team. Have fun with your dogs they are amazing creatures.

## RallyO Report

RallyO continues to be well supported at club. We run the RallyO link on the first Tuesday of the month and we run training on the third Tuesday of the month. However, our RallyO nights will change to Mondays from November this year.

We had a successful RallyO competition at the Napier Dog Training Club in May. It was great to see our club members doing well. Remember, all club members are welcome to come along and have a try.

There will be a NZARO Expo in Feilding on 4 and 5 August. This is an indoor show so no worries about the weather. Details and online entries available at <http://nzaro.webs.com/>

I hope to see a lot of people there having fun.

**Robyn Fargher**

## ScentWork Report

Our ScentWork classes are coming along nicely now. Those of us that have been doing this for a few months are thoroughly enjoying it. ScentWork is based on the work that drug detection dogs do but our dogs start off with clove oil.

There are four different search areas: containers; car; inside; and outside. The inside and outside can be set up as different scenarios and can be just everyday things.

In March, three of us went to Wellington for a ScentWork trial. None of us passed that one because we all failed on at least one of the searches.

However, in May four of us went down to Kapiti. It was a wet cold morning but slowly cleared. The three who had been to the first trial passed but the other one failed. We have to pass each level twice to move on to the next level.

If anybody is interested, come along on a Thursday night but make sure to ring Maria on 870 3742 or 021 062 8316 first, as sometimes we go out to other places to train.

## Canine Good Citizen (CGC) Report

The CGC classes have been well attended this winter term - thank you to all those hardy people who come out. We are trying to find places that are a bit sheltered and dry to work in!

Napier Dog Training Club recently held an assessment at their grounds and very kindly invited us to join in. We had excellent results! Congratulations to:

- Karen Burnham & Vinnie - passed Foundation and Bronze
- Olivia McLaren & Macduff - passed Bronze
- Jackie Olley & Cherchez - passed Bronze and Silver
- Angela Simmons & Buddy passed Gold
- Chrissy Harris & Lace passed Gold

Thank you to the helpers who came along and Napier Club for hosting us.

We are planning an assessment at the end of this year, keep working on this! The big things that came out of the assessment were loose lead heel work and recalls. Practice these where ever and whenever you can - 5 minutes a day soon adds up and pays big dividends. If your dog learns he has to behave EVERYWHERE you go they become a real pleasure to take out.

Have fun with your dogs they are great personal trainers and friends.

## Flygility Report

After an incredibly long autumn where we managed to train successfully in balmy temperatures June decided that enough was enough and the weather has played havoc with training since. Nonetheless, most flyers have come along to let their dogs enjoy doing what most of them seem to enjoy doing the most - letting rip, chasing and fetching that tennis ball.

The weather also posed an unexpected number of challenges - taking us three attempts before being able to run the NALA link competition for June/July - so very unlike Hawke's Bay! Nonetheless - we are still well represented in the monthly results - hopefully that will continue for the rest of the NALA year (April - March).

Finally, Tukituki Flyers ran another successful event over the Easter Weekend - our thanks to HB Racing Inc for allowing us to use the grounds. It was fantastic to see some of the young dogs and new handlers competing and getting results. So don't forget, if your dog has had some agility training and loves a tennis ball you're welcome to come along to training currently 6pm fourth Tuesday of the month.

## Cranial Cruciate Injury in the Dog

### What is the cranial cruciate ligament?

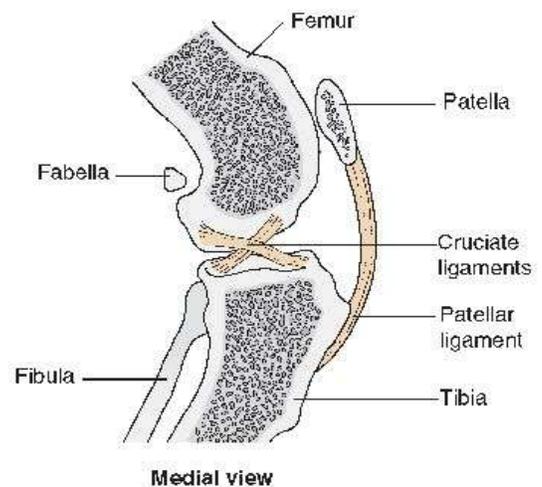

The stifle joint (or knee) of the dog is situated between the large thigh bone (femur) and the 2 lower shin bones (tibia and fibula). A ligament is a dense fibrous band that connects one bone to another. The stifle joint is kept stable by a series of ligaments, the collateral ligaments that prevent the joint moving sideways and the cruciate ligaments which cross in the centre of the joint and prevent rotation and backwards and forwards movement of the joint.

### Cranial cruciate rupture and causes:

Cranial cruciate rupture is the tearing of the ligament leading to instability of the stifle joint. It is the most common cause of hind leg lameness in the dog and a major cause of arthritis. Rupture may be acute or chronic in nature. An acute injury to the ligament is usually related to a traumatic event causing the limb to rotate – such as sudden twisting, stepping into a hole or jumping. Chronic cruciate injury is generally related to age related deterioration, obesity, or conformation abnormalities. Large breed dogs with straight hind limbs are more predisposed as more force is placed on the cruciate ligament. In cases of chronic cruciate degeneration up to 50% of dogs will rupture the

cruciate ligament in the opposite hind leg within 2 years. Risk factors for cruciate injury are large active dogs, obesity and intermittent excessive activity by inactive dogs.

### Cross section through the joint

### Clinic Signs:

Signs will vary depending on the nature of the injury. An acute complete rupture of the cruciate ligament often presents with a non-weight bearing lameness of the affected hind leg of sudden onset – often related to exercise/play. Dogs with a more chronic injury or only a partial tear to their cruciate ligament, may only present with a mild lameness associated with exercise that often improves with

rest. Often as the ligament degenerates the stifle becomes increasingly unstable and the lameness gradually gets worse. On examination, your veterinary surgeon may be able to detect pain and swelling of the affected joint. With more chronic injuries there may be swelling on the inside of the joint related to scar formation. With some dogs they may be able to detect instability (called the cranial drawer sign) of the joint – meaning the joint can move backwards and forwards. Often though, your dog will need to be sedated to check for instability as pain and nerves will cause them to tense their muscles so the instability cannot be appreciated in the consult.

## Treatment options:

### i) Conservative therapy

With small breed dogs under 10kg of weight, conservative therapy may be sufficient. This involves 6-8 weeks of rest, anti-inflammatory medication followed by gradual return to exercise and weight loss if indicated. Ligaments have a limited blood supply so are unable to heal, however with time the body can stabilize the stifle joint using scar tissue. Approximately 65% of dogs will recover by 6 months. With large dogs however, continual instability of the stifle joint leads to progressive arthritis and ongoing lameness and pain. In view of this it is preferable to surgically stabilise the joint.

### ii) Surgical Options:

There are many surgical options including:

**Extra-articular method** – this involves the placement of a large suture outside the joint in the approximate plane of the ligament, to tether the femur to the tibia. This procedure relies on scar tissue to ultimately cause stability of the joint. Post operative rest is crucial to the success of the surgery. Most dogs will return to 75% of their normal function.

**MMP (Modified Maquet technique)** - this is a modification of the TTA technique but is a simpler procedure with shorter surgery times. It can often be performed by an experienced vet in your own clinic that has received specific training. The advantage of this is your dog will not need to be referred to a specialist and the cost is less compared with the TTA/TTO/TPLO techniques. The MMP is performed by making a cut (osteotomy) down the front part of the tibia and then levering the bone forward. This is stabilized using a porous titanium foam wedge, which is a modern material that promotes rapid bone growth and healing. The bone is further stabilized using a pin and titanium staple. The overall aim is to redirect the forces on the knee so that the patella tendon acts in a similar way to the cruciate ligament.

**Tibial Plateau Levelling Osteotomy (TPLO), Tibial Tuberosity Advancement (TTA) and TTO (Triple Tibial Osteotomy)** are specialised surgical techniques that need to be performed by a surgeon trained in these techniques. The aim of these

procedures is similar to that of the MMP technique but is more complex to perform.

### **Post operative complications**

Regardless of the surgical technique complications post operatively can include infection, surgical wound problems, implant breaking (suture/plate), tibial fracture, meniscal tears (cartilage) or failure to return to exercise.

### **Aftercare and long-term prognosis**

With all procedures a controlled exercise program will be required to gradually return your dog back to full exercise after a number of weeks. Physiotherapy is proven to speed recovery from cruciate injury and aid full return to mobility- regardless whether surgery was performed or not. There are an increasing number of physiotherapist and vets that can help. Many dogs can return to full athletic performance after surgery but unfortunately osteoarthritis often will progress over time. Your dog may gradually become less active especially in the cold weather and may become stiff after a period of rest. Controlling your dog's weight and moderate daily exercise may help to ameliorate these signs.

# IMPORTANT NOTICES

## HEALTH AND SAFETY

Racecourse Management has asked me to remind our members about how their health and safety requirements affect our Club.

The racecourse is a work place so there are potential hazards to be aware of namely tractors, vehicles and racehorses. Because of this the Management have asked that we observe the following rules

- **NO dogs or people** on the course before 11am - as this is the time when there are horses in training.
- **All dogs** on leads during working hours (11am to 5pm) because there are people and tractors working during these hours .

The Management has no problem with Club members exercising their dogs off lead after 5pm before class but asks for consideration if there are tractors working - no one wants dogs or people injured.

**Always pick up after your dogs and don't forget to take it away with you we don't have a bin service!**

We are lucky to have this area to exercise our dogs - please respect it.

**If you have any queries regarding membership please contact one of the Members' Officers - either Maria Noanoa, phone 870 3742 or 021 862 8316 or Dionne Robinson, phone 870 6122 or 027 450 4504**

If you are thinking about moving, let's work together to help both YOU and Hawke's Bay Dog Training Club achieve a great result.

For every property that is listed and sold with us, we will give \$500 back towards Hawke's Bay Dog Training Club for them to use to benefit your children.

Give me a call today, I would love to hear from you.
